SEWER FLUSHING VEHICLE KOMBI-M-U-T

DRAWS. POWERFUL. UNIVERSAL.

The perfect choice for withdrawing by suction and flushing.

The wide range of variations of the **M-U-T sewer flushing vehicles** proves itself on the **high reliability** and the **maximum suction power and compression** - when it is to be really clean.

The ergonomic and sturdy design in an ideal combination with different types of equipment, make the **M-U-T sewer flushing vehicle** to one of the **most profitable and economical suction and flushing vehicles** on the global market.

BENEFICIAL

The thoughtful and compact construction design enables **extremely fast and flexible operations** without any retooling.

- the **M-U-T-tank-in-tank-system** optimizes the axle load ratio of the vehicle - **extremely short overhang** due to the construction and shortened wheelbase at the same time
- **combination attachment** is hydraulic rotatable and telescopic, via a wireless remote control
- **optimized and ergonomic working space**, adjusted to the vehicle

CLEAN

- **High tightness** due to the design of the system
- **tank washing facility** and **draining aid** by a washing nozzle in the front of the mud tank

SAFE

- automatic locking of the control parts
- safety space towards the hazard area, via wireless remote control for the hydraulic combination attachment
- increased operational safety, power efficiency and smoothness due to latest electronics

ADAPTABLE

- body size for **two- to four-axle chassis**
- **combination** of suction and high pressure flushing vehicle
- **optimized version**, adjusted to the chassis
- container made out of **stainless steel**
- **M-U-T-tank-in-tank-system** optimizes the weight distribution for an **ideal axle load ratio**
- serial **high pressure pump** and **vacuum pump**
- **high pressure hose reel**, hydraulically powered
- delivery for case of suction hose
- **3-stage-water-recycling-system**: coarse precipitator, rotating-gap-filter, cyclone
- facility for **self-cleaning filters** - no additional maintenance effort
- delivery for case of suction hose
- **Industry X.0-capable** - digital integration into the fleet
- panels on the side (optional) can be used as a large advertising space
- minimum warranty of 2 years

EXPANDABLE

M-U-T Visibility and Safety Packages

- camerasystem, up to 360° all-round visibility
- LED-all-round light
- numerous other options available

M-U-T EASY-WORK-Packages

- different sizes of hose reels
- delivery for case of longer suction hoses
- **M-U-T-XXL-series** for **unusual demands**
- numerous other options available

M-U-T Service Packages

- warranty extension up to 60 months
- care of vehicle fleet, incl. annual check
- servicepackage „M-U-T All In“

M-U-T Control Panel

- central control over the KOMBI-M-U-T either at the lit-up control panel or via wireless remote control possible
- simple operation of all work steps

M-U-T EXPERIENCES FOR 90 YEARS

Thoughtful M-U-T-Design

Optimized even axle load distribution during different loading conditions, concerted components and variable configurability at the same time make the M-U-T sewer flushing vehicle to the most flexible and powerful suction and flushing vehicles on the market. High system tightness due to the special design.

Labour Protection and Safety

Automatic locking of all components, good overview of the vehicle as well as optimum lighting in the working area. Ergonomic design and low noise operations due to optimized system design.

Economic Efficiency and high Availability

High flexibility caused by low tare weight, low-maintenance and long lasting structure: low wear and tear because of the usage of stainless steel particles and just few moving parts.

Convenience

Simple handling via the adaptable **M-U-T-Multifunctional-Touch Display** and **wireless remote control. Industry X.0-capable** - for an ideal digital integration into the fleet.

Variety of Models and Modularity

Different sizes of construction available, with adjustable data of performance - for different types of operations and customer requests - up to XXL-versions.

The wide range of additional equipment in the scope of safety, environmental protection and convenience as well as diverse attachments, allows an individual adjustment of the M-U-T sewer flushing vehicle to the required claims and tasks.
