

since 1932

REAR LOADER VEHICLE PRESS-M-U-T

MUTABLE. VARIABLE. SAFE.

The perfect companion to collect waste.

The **PRESS-M-U-T** proves itself on its **high reliability**, with **highest variability** for the collection of **all types of waste**: starting from household waste over bulky waste up to cardboard and plastics.

The perfect combination of ergonomic and robust design with different types of equipment, makes the **PRESS-M-U-T** to one of the **best and most durable collection vehicle** on the global market.

VARIABLE

The **compact rear part** enables a very fast and neat installation of **all bin lift systems**:

- M-U-T
- Terberg
- Zöller
- others

The **space saving structure shortens the overhang** at the back, offers **high chassis clearance** and **optimizes the axle load ratio** of the vehicle.

- high maneuverability
- preserving the chassis
- maximum payload - more waste, less consumption
- low maintenance costs
- weighing-system for waste bins (optional)

SAFE

- Automatic lock of the rear part
- increased operational safety, power efficiency and smoothness, due to latest electronics
- optimal protection of the loading staff, due to M-U-T tread (optional: **plastic safety tread**, colour selectable)

ELECTRICAL

With **M-U-T ELECTRIC** (optional) into an emission-free future: M-U-T- vehicles, which are **designed solely electrical**, guarantee a **much higher economic efficiency** and **longer service life**, in comparison to the conventional drive concept.

EXPANDABLE

The optional **reinforced version** of the loading tub in **Hardox450 to 10mm** (and more) guarantees an **even longer service life**.

M-U-T Visibility and Safety Packages

- camerasystem, up to 360° all-round visibility
- LED-all-round light
- numerous other options available

M-U-T EASY-WORK-Packages

- hydraulic rope pulling device for large containers (operable with radio control)
- container for special tools
- overall structure-weighing system with integrated waste bin-weighing system
- numerous other options available

M-U-T Service Packages

- warranty extension up to 60 months
- care of vehicle fleet, incl. annual check
- Servicepaket „M-U-T All In“

ADAPTABLE

- body size to **30 m³**, and more
- for **two- to four-axle chassis**
- **high wear-resistant tank bottom**, all of a piece
- **maximum compression**, due to back pressure system, adapted to particular types of waste
- higher stability and longer service life, due to **roller bearing from hardened steel** (no slide block)
- carrier material between rolls and sledge barrier for **preventing deposit**
- optimal crack construction and flexible loading tub **prevent deadlock**
- **higher total capacity**, due to the ejection plate, perfectly adapted to space conditions
- **Industry X.0-capable** - digital integration into the fleet
- side panels can be used as advertising space
- minimum warranty of 2 years
- **highly mutable collector** for households and industry - the „omnivore“

Capacity optimized tank (optional)

- high container for +2m³
- low container (e.g. for pass limitations)

M-U-T Multifunctional Touch Display

- central control over superstructure
- simple operation of all work steps
- individually configurable: e.g. in order to allow a smooth change of drivers within the association

M-U-T EXPERIENCES FOR 90 YEARS

Thoughtful M-U-T-Design

Even axle load distribution during different loading conditions, short overhang, offers high chassis clearance; for the usage of commercial DIN-bin lifts. High system tightness due to the special design.

Labour Protection and Safety

Automatic lock of the rear part, weight-monitored running boards, optimum lighting in the working area, ergonomic design. Soundproof operation according to optimized system construction.

Economic Efficiency and high Availability

High load capacity caused by low tare weight, low-maintenance structure and long-lasting components: low wear and tear due to usage of stainless steel particles and few moving parts.

Convenience

Simple handling via the adaptable **M-U-T-Multifunctional-Touch Display**.
Industry X.0-capable - for an ideal digital integration into the fleet.

Variety of Models and Modularity

Available in different heights, widths and lengths of the construction, for different types of operations and customer requests.

The wide range of additional equipment in the scope of safety, environmental protection and convenience as well as diverse attachments, allows an individual adjustment of the waste collection vehicle to the required claims and tasks.
